

## Step-1

Let  $A$  be  $n$  by  $n$  matrix.

$$x = \begin{bmatrix} 1 \\ 1 \\ 1 \\ 1 \end{bmatrix}$$

The null space of  $A$  contain

It gives  $Ax = 0$  then  $A^T Ax = 0$

Therefore, the null space of  $A^T A$  contains  $(1, 1, 1, 1)$ .

## Step-2

So, the dimensions of null space of  $A^T A$  is,

$$\dim(N(A^T A)) = 1$$

The rank of  $A^T A$  is,

$$\begin{aligned} \text{Rank}(A^T A) &= n - 1 \\ &= n - 1 \end{aligned}$$

Therefore, the rank of  $A^T A$  is  $n - 1$ .
