

Step-1

In case of a diagonal matrix, its inverse is obtained by keeping the off diagonal elements as zeros only and then writing reciprocals of the diagonal elements.

Since D is a diagonal matrix, which has either 1 or $\neq 1$ along the diagonal, its inverse D^{-1} has to be same as D , since reciprocal of 1 is 1 and reciprocal of $\neq 1$ is $\neq 1$ only.

Thus, we want $DAD = B$.

Step-2

Let $D = \begin{bmatrix} a & 0 & 0 & 0 \\ 0 & b & 0 & 0 \\ 0 & 0 & c & 0 \\ 0 & 0 & 0 & d \end{bmatrix}$, where each of a, b, c , and d is either 1 or $\neq 1$.

Consider the following:

$$\begin{aligned} \begin{bmatrix} 2 & -1 & 0 & 0 \\ -1 & 2 & -1 & 0 \\ 0 & -1 & 2 & -1 \\ 0 & 0 & -1 & 2 \end{bmatrix} &= \begin{bmatrix} a & 0 & 0 & 0 \\ 0 & b & 0 & 0 \\ 0 & 0 & c & 0 \\ 0 & 0 & 0 & d \end{bmatrix} \begin{bmatrix} 2 & 1 & 0 & 0 \\ 1 & 2 & 1 & 0 \\ 0 & 1 & 2 & 1 \\ 0 & 0 & 1 & 2 \end{bmatrix} \begin{bmatrix} a & 0 & 0 & 0 \\ 0 & b & 0 & 0 \\ 0 & 0 & c & 0 \\ 0 & 0 & 0 & d \end{bmatrix} \\ &= \begin{bmatrix} 2a & a & 0 & 0 \\ b & 2b & b & 0 \\ 0 & c & 2c & c \\ 0 & 0 & d & 2d \end{bmatrix} \begin{bmatrix} a & 0 & 0 & 0 \\ 0 & b & 0 & 0 \\ 0 & 0 & c & 0 \\ 0 & 0 & 0 & d \end{bmatrix} \\ &= \begin{bmatrix} 2a^2 & ab & 0 & 0 \\ ab & 2b^2 & bc & 0 \\ 0 & bc & 2c^2 & cd \\ 0 & 0 & cd & 2d^2 \end{bmatrix} \end{aligned}$$

Step-3

$$\begin{bmatrix} 2 & -1 & 0 & 0 \\ -1 & 2 & -1 & 0 \\ 0 & -1 & 2 & -1 \\ 0 & 0 & -1 & 2 \end{bmatrix} = \begin{bmatrix} 2a^2 & ab & 0 & 0 \\ ab & 2b^2 & bc & 0 \\ 0 & bc & 2c^2 & cd \\ 0 & 0 & cd & 2d^2 \end{bmatrix}.$$

Thus, we have

Therefore, we get the following three equations:

$$ab = -1$$

$$bc = -1$$

$$cd = -1$$

Hence, if $a = 1$, then $b = -1$. This gives $c = 1$ and $d = -1$. Or, if $a = -1$, then $b = 1$. This implies that $c = -1$ and thus, $d = 1$.

Step-4

Thus, we get the two following diagonal matrices so that A will be symmetric to B :

$$\begin{bmatrix} 1 & 0 & 0 & 0 \\ 0 & -1 & 0 & 0 \\ 0 & 0 & 1 & 0 \\ 0 & 0 & 0 & -1 \end{bmatrix} \text{ or } \begin{bmatrix} -1 & 0 & 0 & 0 \\ 0 & 1 & 0 & 0 \\ 0 & 0 & -1 & 0 \\ 0 & 0 & 0 & 1 \end{bmatrix}.$$
